ABOUT ME

I am a man of logic and deduction, devoted to the pursuit of truth and justice in cases that baffle Scotland Yard. My methods are scientific and systematic—where others see confusion, I perceive order and pattern. I apply the exact sciences of observation, chemistry, and criminal analysis to matters that lie beyond the reach of ordinary Scotland Yard inspectors. Between cases of importance, I maintain my monographs on tobacco ash varieties and conduct experiments in chemical analysis. The game, as I have so often remarked, is afoot.

EDUCATION

- 1872 – 1876 ● **Studies in Natural Sciences** | University of Oxford
 - › Focused on chemistry, anatomy, and criminal analysis
 - › Conducted early experiments in forensic detection and chemical analysis
 - › Dissertation on tobacco ash: A monograph identifying 140 varieties from appearance alone
 - ⊗ Chemistry, Anatomy, Forensic Analysis
- 1876 – 1878 ● **Self-Directed Studies in Detection** | Independent Research, London
 - 1876 – 1877 Development of Observational Techniques
 - › Catalogued tobacco ash varieties and their forensic applications
 - › Established systematic methodology for crime scene analysis
 - 1877 – 1878 First Practical Applications & Early Cases
 - › Applied deductive methods to minor investigations around London
 - › Refined disguise techniques and psychological profiling methods
 - ⊗ Criminal Law, Disguise, Observation
- 1878 – 1881 ● **Apprenticeship in Detection** | Various Investigations, London
 - › First cases solved through purely deductive reasoning
 - › Established reputation with Scotland Yard officials
 - › Developed proprietary methods still unmatched by police forces
 - ⊗ Investigation, Deduction, Case Analysis

CAREER

- 1881 – 1891 ● **Consulting Detective & Partner to Dr. John Watson** | 221B Baker Street, London
 - › Partnership with Dr. John Watson yielded numerous documented cases of international significance
 - › Solved cases involving the Crown, foreign governments, and criminal organizations
 - › Achieved unprecedented success rate through systematic application of logic and science
 - › Maintained practice while pursuing research in specialized monographs
 - ⊗ Deduction, Disguise, Chemistry, Magnifying Glass
- 1891 – 1894 ● **Continental Travels & Disappearance** | Throughout Europe
 - › Pursued arch-nemesis Professor Moriarty across Europe in pursuit of justice
 - › Investigated cases of international criminal conspiracy
 - › Presumed lost at Reichenbach Falls following confrontation with Moriarty
 - ⊗ Tracking, Infiltration, Criminal Psychology

1894 –
1903

● **Consulting Detective & Master of Disguise** | 221B Baker Street, London

- › Returned to practice following resolution of Moriarty matter
 - › Cases grew in scope and complexity, drawing international clients
 - › Continued collaboration with Dr. Watson on case documentation
 - › Refined and perfected methods through hundreds of investigations
- ⚙ Deduction, Observation, Advanced Chemistry, Bees

1903 –
present

● **Retired Detective & Beekeeper Philosopher** | Sussex Downs, England

- › Retired from active practice to pursue philosophical studies and beekeeping
 - › Consults on cases of sufficient interest or international importance
 - › Conducted advanced work on tobacco ash analysis and criminal psychology monographs
 - › Maintains correspondence with officials worldwide on matters of detection
- ⚙ Beekeeping, Philosophy, Monograph Writing

NOTABLE CASES

1881

● **A Study in Scarlet** | The Scarlet Thread - Scotland Yard Utterly Baffled

- › First documented case demonstrating pure deductive reasoning
 - › Tracked criminal across continents using trace evidence and psychology
 - › Established Sherlock Holmes' methods as superior to official investigation
- ⚙ Deduction, Criminal Records, Psychology

1889

● **The Hound of the Baskervilles** | Curse of the Supernatural - A Matter of Science

- › Unmasked elaborate criminal conspiracy disguised as supernatural phenomenon
 - › Applied logic and investigation to dispel false accounts of supernatural curse
 - › Saved an innocent man from criminal machination and certain death
- ⚙ Observation, Photography, Criminal Analysis

1891

● **The Final Problem** | Moriarty - The Napoleon of Crime

- › Pursued and confronted arch-nemesis Professor Moriarty at Reichenbach Falls
 - › Attempted destruction of vast criminal empire spanning three continents
 - › Case concluded in apparent mutual destruction at Alpine precipice
- ⚙ Strategy, International Intelligence, Tracking

1894

● **The Empty House** | Return from the Grave

- › Returned to London after years presumed dead to dismay of criminal elements
 - › Pursued remaining agents of Moriarty's organization
 - › Resumed practice with renewed dedication to justice
- ⚙ Disguise, Infiltration, Observation
